ROOM FOR EVERYTHING BUT IMPROVEMENT

BETTER

EXCLUSIVE "5 WAYS TO COOK" SYSTEM THAT ALLOWS YOU TO GRILL, SEAR, SMOKE, ROTISSERIE COOK AND CHARCOAL GRILL.

HOTTER

MOST BTU'S PER SQUARE INCH FIRES UP THE HEAT FASTER AND STAYS HOT.

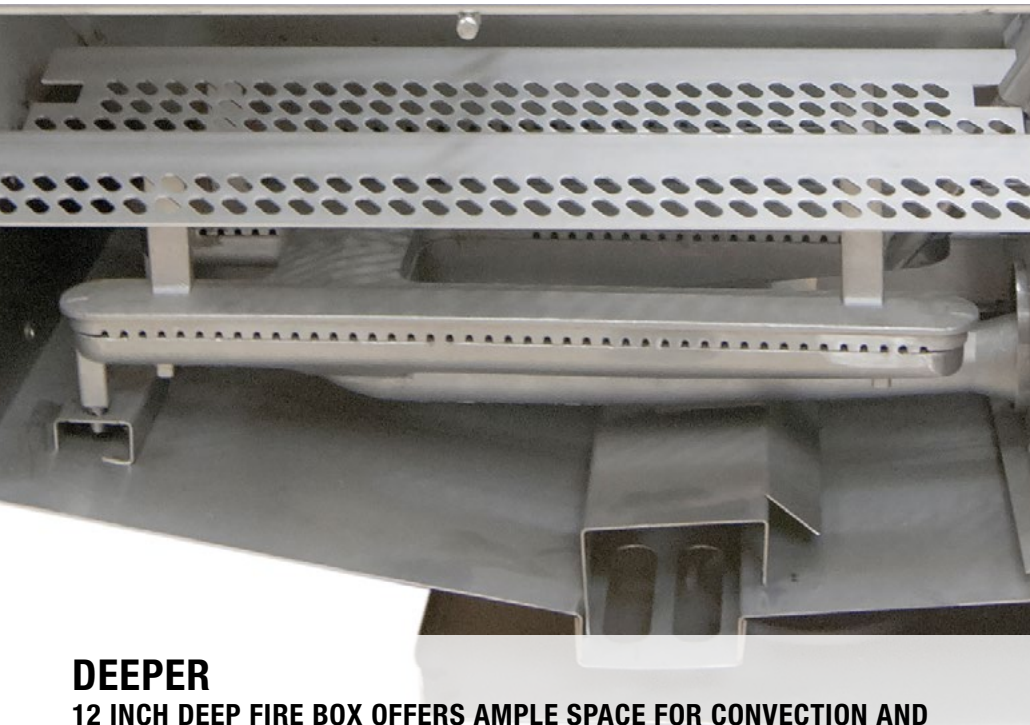

ROOMIER

MORE COOKING SURFACE THAN ANY OTHER GRILL.

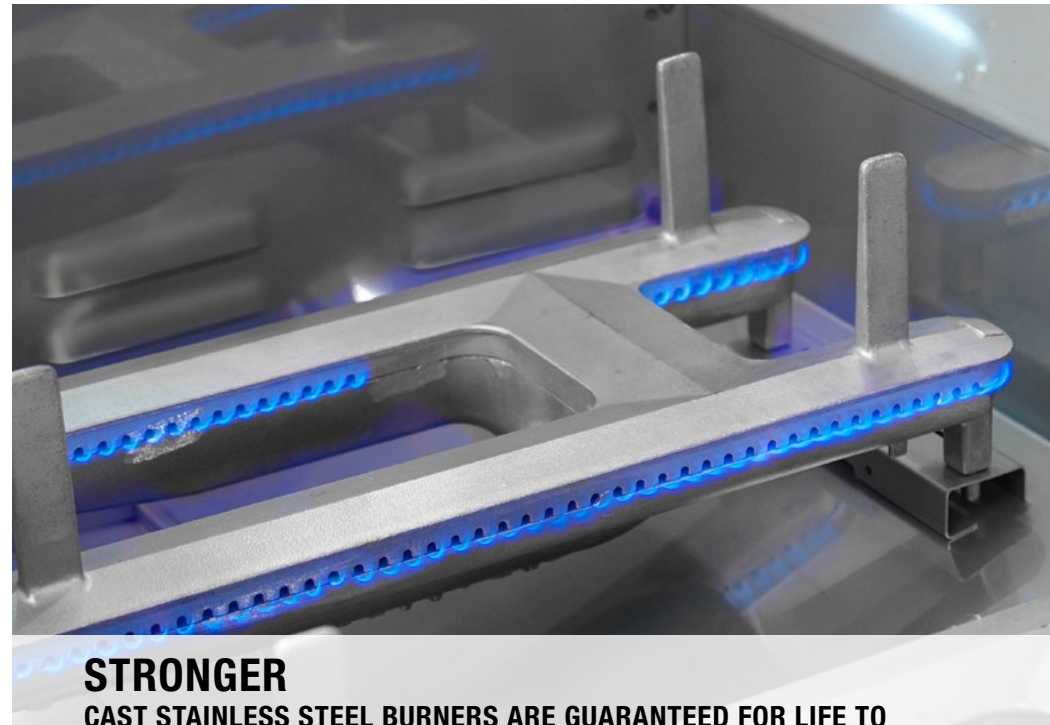

TASTIER

STAINLESS STEEL FLAVOR GRIDS MINIMIZE FLARE UPS AND FLAVOR FOOD BY VAPORIZING JUICES.

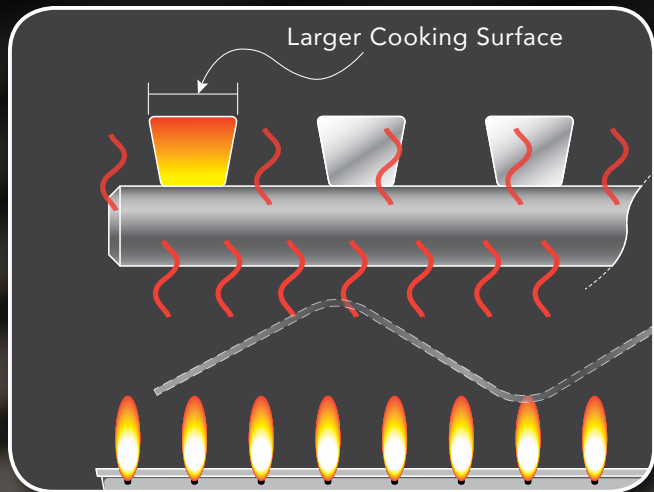

DEEPER

12 INCH DEEP FIRE BOX OFFERS AMPLE SPACE FOR CONVECTION AND INDIRECT COOKING.

STRONGER

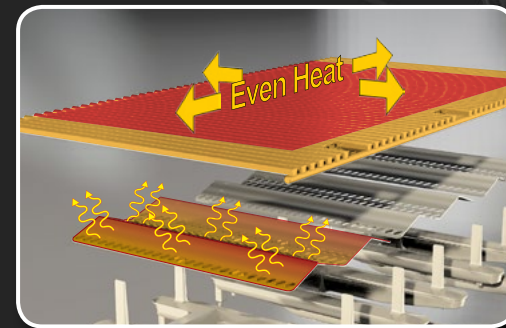

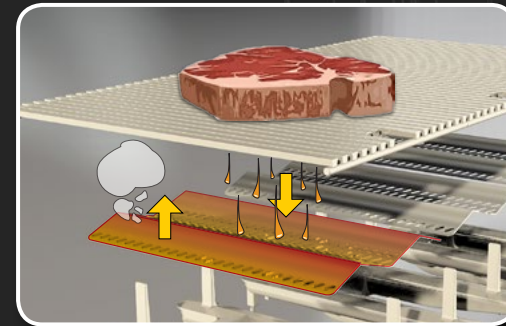

CAST STAINLESS STEEL BURNERS ARE GUARANTEED FOR LIFE TO DISTRIBUTE HEAT EVENLY.

Diamond Sear Cooking Grids

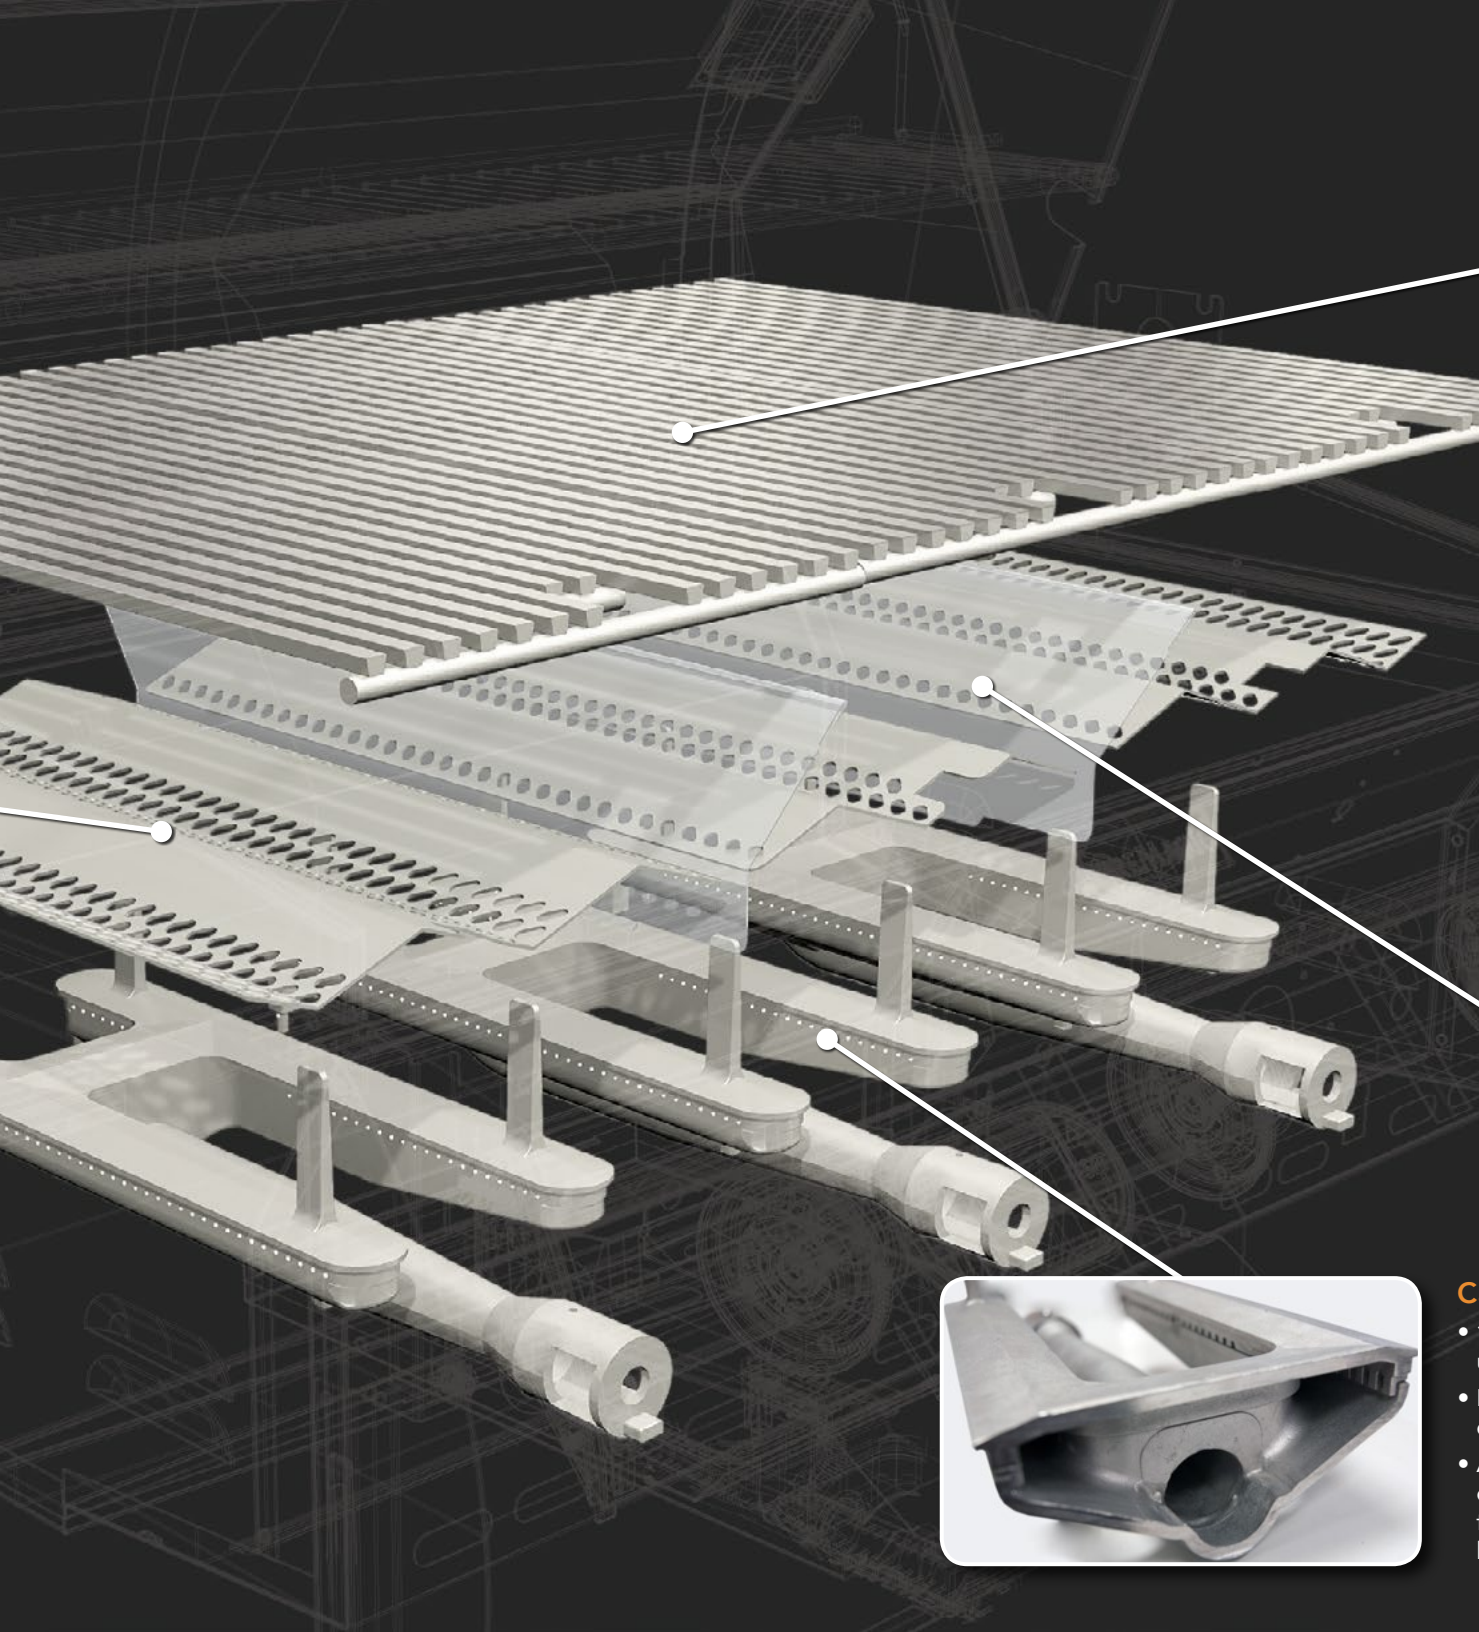

- Trapezoid cooking grids promote more optimal heat transfer to food. With more surface area, similar to a griddle, the trapezoid shape with angled sides improves the flow of heat to the cooking surface.
- The trapezoid grid is easier to cook on as foods release from the surface more easily with less sticking.
- Trapezoid grids have more contact surface than round grids. This provides more points of contact that help to sear your meat better and faster.
- More efficient heat transfer and quicker cooking result in less use of gas.

Advanced Heat Distribution System

Flavor Grids

- Heavy gauge stainless steel flavor grids minimize flare ups, provide quick and even heat distribution and flavor food by vaporizing juices.
- Designed to provide distributed heat to the cooking grids; they don't retain or block heat from rising.
- Easy to clean and maintain.
- Simple to remove when rotisserie cooking (for largest rotisserie area).

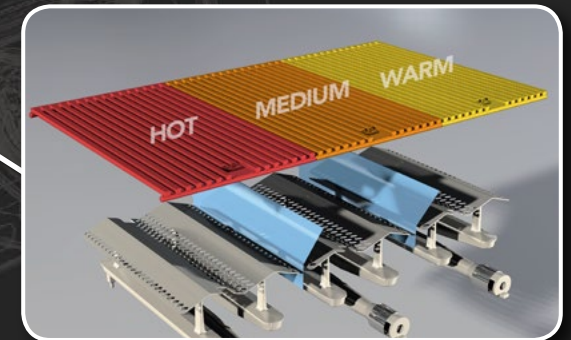

Largest Cooking Area

Fire Magic® grills provide more cooking area than other grills and more BTU's per square inch of cooking surface.

Echelon Heat Zone Separators

Echelon grills feature heat zone separators between each burner, flavor grid and cooking grid to allow cooking an assortment of foods at different temperatures simultaneously, and also provide better indirect cooking.

Cast Stainless Steel "E" Burners

- 1/4" thick cast stainless steel burners weighing up to 12 lbs. each.
- Precision porting – cast to be evenly spaced on each burner.
- An internal baffling system, and carry over slots designed for ease of lighting, and balancing flame and heat; to provide well distributed heat, on high or low in each burner.
