## Water Management System

### Getting Started

## QUALITY WATER CARE

Spend more time relaxing with a hands-free, total water care solution

- 1 Fill hot tub with clean water to just above the highest jet
- 2 Using a test strip, test the water to determine levels of pH, Total Alkalinity and Calcium Hardness and adjust accordingly
- 3 Install Sundance® SunPurity™ mineral cartridge as directed
- 4 With the jets on, add the correct amount of chlorine sanitizer
- 5 Add the recommended dosage of SunPurity™ PLUS to your water
- 6 Run jets for 20-30 minutes with hot tub cover open and retest; be sure to monitor your hot tub for safety while cover is open

### AFTER EACH USE

- Add 1 teaspoon chlorine sanitizer and 1 capful of shock. Run the jets for 5 minutes and close the cover.
- Add the recommended amount of shock after heavy use.

### ONCE A WEEK

- Check the water using test strips to measure levels and adjust them as necessary.
- Add SunPurity™ PLUS to your water - it's best to do this step on the same day of the week, every week.

### ONCE A MONTH

- Rinse and clean filters with garden hose or filter flosser.

### EVERY 3 MONTHS

- Replace your Sundance® SunPurity™ mineral cartridge.
- If equipped, properly replace your Sundance® MicroClean® micro filter.
- If needed properly drain and refill your hot tub.
- Clean the cover and hot tub.

### ONCE A YEAR

- Replace your CLEARRAY® UV-C bulb.

### ONCE EVERY 5 YEARS

- Replace your CLEARRAY® PRO<sub>3</sub>TTECT™ Automatic Oxidizer.

# CONTROL YOUR SUNDANCE® SPA Whenever, Wherever...24/7

## SUNDANCE® SPAS PRESENTS ITS VERY OWN SUNSMART® WiFi CLOUD CONTROL APP

The Sundance® SunSmart® Cloud Control App allows you to access your spa whenever, wherever from the palm of your hand 24/7. You can be inside your house, at work, or even on vacation and still have access to your Sundance® spa with the SunSmart® App. Lastly, your app will remind you when it is time for key maintenance like changing filters, CLEARRAY® bulb, or even your water. No more relying on your memory or notes on a calendar to

keep your spa operating at its peak performance.

### BENEFITS/FEATURES

- Get maintenance notifications and water care reminders
- Alert your dealership of service needs
- Control your 880™ Series spa temperature, pumps, lights and more remotely with your smart phone through WiFi
- Set up filtration and heater programming for energy savings and convenience
- Utilize lock out settings for spa safety
- View owner's manual, troubleshooting and FAQs

### CONTROLS AT YOUR FINGERTIPS

# Care and Cleaning of SUNSTRONG® Covers

- 1 First remove any debris, use a soft nylon brush to remove any small particles.
- 2 Once the cover is free from any type of debris, you can use a hose and a soft nylon brush with mild detergent and give the cover a gentle scrub.
- 3 If there is any tree sap, place an ice cube on top of the area and once hard, try to peel off carefully. This usually helps remove any sticky residue.
- 4 Rinse and clean and do not allow soap to dry on the cover. Do not use soap on the underside of the cover.
- 5 Do not use any solvents, abrasive cleaners or strong detergents. Fabric Cleaners such as 303 Outdoor fabric cleaner are safe to use with SUNSTRONG®, but be sure not to use any type of vinyl cover cleaners as they won't work on fabric.
- 6 Do not use products that contain silicone or alcohol.
- 7 Once your cover is washed, rinse it out and let it dry in the sun. Then after that sit back and enjoy your hot tub!
